github.com/azizkza99

Industrial Engineering graduate with hands-on experience in production planning, process improvement, quality, and supply-chain analysis across manufacturing and EPC environments in Saudi Arabia and Türkiye. Combines engineering thinking with Arabic-first web systems built using React, TypeScript, Supabase, and Three.js. Trilingual in Arabic, English, and Turkish.

PROFESSIONAL EXPERIENCE

Production Planning Intern | EDAS Yatak

Kayseri, Türkiye | Aug 2025 - Oct 2025

- Prepared and monitored daily production schedules, coordinating across departments to keep workflow aligned with delivery priorities.
- Reviewed production-performance data to identify bottlenecks and translate findings into practical workflow improvements.
- Applied production-planning and industrial-engineering principles to improve task sequencing and process organization.

Operations & Process Improvement Intern | Murat Şahin Orman Ürünleri

Tokat, Türkiye | Jan 2025 - Jul 2025

- Worked across plywood and MDF cutting, pressing, and finishing stages while observing handoffs and constraints along the production flow.
- Tracked daily output, packaging, and storage activities, highlighting opportunities to reduce waste and improve material movement.
- Performed surface and dimensional quality checks and used SolidWorks for basic engineering-support and modeling tasks.

Project Management Intern | Delta CJSC

Jeddah, Saudi Arabia | Jul 2024 - Aug 2024

- Organized project files and operational data while supporting daily EPC coordination and a clear view of work status.
- Prepared Excel reports for schedules and logistics and contributed ideas during workflow-improvement discussions.

Engineering Intern | Delta CJSC

Riyadh, Saudi Arabia | Jul 2022 - Aug 2022

- Supported coordination across engineering, procurement, and construction while monitoring timelines and project KPIs.
- Improved scheduling and logistics reports in Excel and contributed to discussions on more efficient service delivery.

SELECTED TECHNICAL PROJECTS

FORM - 3D Product Configurator

React | Three.js | Vite | WebGL

- Translated industrial door specifications into a bilingual interactive experience with a procedural 3D model, live specification sheet, accessible controls, and WebGL fallback.

bezi-product-viewer.vercel.app | github.com/azizkza99/bezi-product-viewer

Kayan - Workflow Automation Concept

React | TypeScript | Supabase | Row-Level Security

- Built an Arabic-first workflow discovery experience with real Supabase submission, database access controls, localized validation, and responsive feedback states.

kayan-app-henna.vercel.app | github.com/azizkza99/kayan-app

ECLIPSE - Premium Coffee Experience

TanStack Start | React | TypeScript | Resend

- Developed a bilingual product experience with server-validated booking and a coffee recommendation flow; reduced video assets from about 79 MB to under 8 MB.

eclipse-luxury-experience.vercel.app

EDUCATION

BSc in Industrial Engineering - Üsküdar University

Istanbul, Türkiye | 2020 - 2024 | GPA: 2.75 / 4.00

ACADEMIC ENGINEERING PROJECTS

- Workforce planning: designed and analysed a 14-question survey across eight companies covering selection, development, and succession planning.
- Supply chain and revenue: analysed 85% machine utilisation and waste rates of 0.5-1.5% to identify operational improvement opportunities.
- Virtual machine placement: built a QoS- and SLA-constrained MIP model that achieved a zero optimality gap in the tested scenarios.

SKILLS

Engineering: Production planning, process improvement, Lean, 5S, quality control, supply chain, mathematical modelling

Technology: React, TypeScript, JavaScript, TanStack Start, Supabase/PostgreSQL, Three.js, HTML/CSS, Git/GitHub, Vercel

Tools: Microsoft Excel, SolidWorks, AutoCAD, Microsoft Office

Languages: Arabic - Native | English - C1 | Turkish - B1
